originally written for CIA, now using for submission to inspector general's
office.

hey, I am curious to know if you can point me in the right direction on getting help with the use and abuse of psychotronics and synthetic telepathy here in the USA. sure you have had people contact you before about it, you yourself might not know it exists, people tend to say people with knowledge of it are crazy. psychotronics usually refers to technology that can read brainwaves, like mind reading tech. its really advanced. they can see what I see, hear, feel, detect nerve impulses, I can sort of control the machine, move sound around my body, it responds to thought, they can also see what I think, imagine, explore memory, see what memory comes up as associated with what I am thinking, or my environment and what I am exposed to. they can also do full thought control, control your emotions, broadcast thought, memory, feeling, images and video, sound and automate most of this, tie it to my responses. sound waves, energy waves, infared, microwaves and radiowaves are used to manipulate me from afar, they can also do things to my body. move tissue around, buzz, tickle, itch, tingle, simulate massage, heat, burn, chill, expand tissue, push, pull, I can hear the sound 24.7, they run dream simulations, talk to me, they repeat it over and over, its computerized, loops and never ending. it changes and is dynamic but it doesn't stop. it can mimic a lot of environmental sound, match energy, pitch, emotion, and blend in, plus sound like other people, its fully produced and rendered in real time, responds to what I do. dreams are nearly video like, produced with story boards just like movies and animation, as they have previously told me. they can encode the emotion or feeling of a thought in messages, like they are saying 'you stop it right now' but I feel the thought and feeling, they make it feel like they are saying they will say you sent it to the wrong place, .. they base the thought on my fears and side worries as I write this. it adapts in real time. they are warming my body, asshole, sexually abusing me, they have forced me to orgasm hundreds of times, they hurt me and pretend I am psychotic. I have been classically gang stalked, I guess that's just how this goes. local government, the police in Springfield OR, the sheiffs, state police, and Oregon state hospital are involved. this is where this all started, in 2007 and 2008 I was being spied on at the hospital, staff were abusive and targeting me with abuse, there was a scandal with staff misconduct, a women named Bonita tucker, who did things inappropriately with me then lied about it, said I was a stalker, in love with her, who knows what else. she then got caught in a romantic relationship with another patient, David Anderson, and brought in drugs and illicit contraband for him, which I witnessed and reported. she did this with others as well, including patient John Eastman. she eventually tried to help David and Gino Puglisi escape OSH, Gino was successful but her boyfriend and future husband got left behind. osh let her resign rather than fire her, she was not arrested, and they tried to protect David and Bonita. I was made a target. they pretended I was psychotic, physically harassed me, let David assault me, staff threatened me and called me names, abused me with medication, made noises around me, whatever. they started to spy on me and try to control me with this technology. staff openly talked about how they had technology to track me and focus on just me inside the building, they could see what I did in the shower, my room, and knew what I was thinking and doing. they used this to abuse and control me. sometime in 2008, staff were bullying me around, hiding my grievances, kicking and banging my door, falsely documenting my behavior as psychotic, they would do the hand gesture to say 'fuck you', ran by my door and banged it, 'we're not afraid of you'. I had an outside doctor say I wasn't psychotic but had ADHD, and that the hospital couldn't medicate me without my consent. staff prescribed large doses of medication anyway, when I refused they gave me a shot, they were deliberately aggressive when they did it. I was ripped off the phone, staff said 'we don't care about your rights, noone will help you' etc. I called the superintendents office, and his receptionist attempted to help me read the policy on forced medication, but a supervising RN named Valerie interrupted her, and she returned to the phone, 'sorry, we were told not to help you' and hung up. it was deliberate and planned hospital wide abuse. staff whistled and made noises at me,

cia.txt

eventually they used this machine to make me hear a loud whistle everywhere I went on the unit, no-one else could hear. in august 2008 they said, 'no-one has ever made it this far' and suddenly I felt my body swell, I started to blow up, sound waves was forcing my body to expand, and I went into shock. they said 'hold still or we will pop your ear'. my eyes and throat began to pulsate, they were making me smile and opening my eye lids, they tried to say it was an unstructured settlement, they played games about getting my own group home, having a social worker, tried to get me to call disability rights Oregon for help, they said I could be special transferred out of osh, a private transfer if it were an emergency, I was going to go with someone named deann major, dro paimi advocate. but she knew it was there and was letting me be abused, she participated, she knew it was happening all along. i had a 170 pulse, I lost memory and had trouble talking or acting after this, they kept screaming at me and abusing me deliberately, they would rig it to repeat everything I said or thought, I stopped sweating, and bowels got dry, muscles clamped down and I lost movement, when I tried to poop, I couldn't go, they would say 'he just likes to smell his own farts'. when I was around women, they tingled my balls and said, 'why do your balls swell'. I didn't know for sure at first, I could hardly feel anything, sound was very loud and was crazy what they did. they started to use the soundwaves on my muscles and body, drilling my inside, my insides buzzed and whipped around, pulsated, eventually my muscles got tighter and more rigid, dryer, and I could no longer move or flex .. I could hardly move or think, no one would help, and I received no medical care. they'd say your either delerius or suicidal, hid abused pretended I assaulted myself and lied about everything in abuse reports. I was being set up to look psychotic they said. I was forcefully medicated and abused with medication after this, and it hurt me even more. they kept on using this on me for the past four years, I got worse and worse. more stiff. in the last year they started to become very abusive, the local police knew what I did in my apartment, conversations I had, conversations my friends had, many people were involved, including my doctors, counselors, sacred heart hospital, the county and I was deliberately abused as I tried to get help, everyone participated and did what these people wanted. in 2011 I tried to get help, and the police assaulted me, beat me up, lied about it, falsified their police report, they knew this was happeneing and lied, I got a broken tooth and nose. in jail they started to sexually assault me, sound moves and heats, tingles my genitals, they make it feel like a female, and have all sorts of impressions and images. Jail staff at lane county jail participated, whistled, denied me medical care and made faces, cooperated with the project and spying and allowed me to be abused in secret. its very long range, at least a few miles, fits in a car or vehicle. people trail me in cars, they used to have a theme song, they followed me everywhere, people would stop and make faces, zip their lips closed, ... in jail they started to rape me, force orgasms, it was jacking my body up. hurting me badly, I was getting stiffer and stiffer, my entire body being damaged. I lost the ability to orgasm in 2010 because of medication and what they did to me with this, antidepressants screwed it up and I became sensitive, now my muscles clamp, dry out, I go into shock, I can't move and hurt all over, i lose memory and feel pressure in my head. they do it to incapacitate me. they are saying the word 'safer' now... 'weirder now'... they say you can tell I don't have the ability to get help, please I just want to say, why would you want to exploit and hurt me like this, I am more important than this technology or these people... I didn't do anything to them or to deserve this, they set me up, they have too much control over me, this county and state is not safe but I can't get free, everyone is involved, won't help, I am restricted on where I can go by my court case. they keep raping me, my brain and body swells, face is swollen, losing vision and hearing, lots of brusing and swelling, muscles pinch and can't move so well, I need functional neurological rehab and protection from this, they will keep hurting me till its stopped.

I believe it works using a device similar to a light or sound projector, but with greater precision. it can project and focus beams of radio, microwave, infared, and sound waves, capable of varying patterns, shapes, frequencies at different and multiple points over a 3D space. it can paint a picture and move sound and energy over a persons body like a video projectors picture moves a screen. it can target muscles, slin, my insides, move and manipilate tissue precisely. energy may focus from multiple points to a single location where it builds or interacts with other energy and beams, so it doesn't effect the spots before or after, and appears inside your body or around an object or person.

cja.txt

My face is numb, I feel intense pain in my head, I feel weak and burning and stinging everywhere, dizziness and sickness occurs, intense dehydration and inability to hear or recover, I am hot, in shock, I have symptoms of brain swelling and brain pressure, which can be fatal and causes damage to the brain. Can't get help..

please let there be good people on the other side of this, I know people in the CIA have this and use it, ... it can link people together and send communication between multiple targets, allow people in the field to know exactly what I am thinking and doing, you can find out anything another person knows and do things in secret to them, hurt or injure them if it was desired.

in 2008 they said 'like you spy for the newspaper, deann major spies for the CIA' . this doesn't really prove who is behind it. CIA could refer to anyone who thinks of themselves as an intelligence gathering entity, or it could mean that she tried to contact the CIA, or worked with the CIA who was operating this - I tried to contact reporters about the situation at osh, and she was portrayed as doing something similar with the CIA. at the time the USDOJ was investigating osh, perhaps resources related to this were being used as a result of their investigation. the usdoj is often associated with the use of this technology on people. the state police might have enough resources to do this, and I know they are involved, but I wouldn't be able to tell from this. in jail they called themselves the army and air force. the air force of course invented voice 2 skull technology in the 1990s. I bet this is being used across America to spy on people in secret or as part of a national intelligence program. as far as I can tell, its ubiquitous.

I can't talk so well right now, head feels tight, burns, I feel really stiff... pressure in my body makes it hard to think or talk, or act on it, there's so much more I remember, this is the best I can do. they are buzzing my anus and balls and bottom right now... I wish it would stop. please inform your top officials. I am being set up and can't defend myself in the legal system without someone helping me, I can't get help without people acknowledging what happened, or acknowledging me being repeatedly injured.

I hope you believe human life is more important than energy weapons and human exploitation. this is automated mindless torture, rape, and mutilation of innocent American citizens. this shouldn't be allowed. we should finally write laws to address these issues and inform the public of this technology and its' existence.

The FBI has received many emails, letters, and phone calls about this, the portland office read over and every agent seemed to know me and what I said and was going through when I called. I believe they participated. When I was arrested in 2011, and assaulted by officer Grice and another guy, grice made mention of FBI agent Roberts getting upset with him for doing it when I was getting treatment at the hospital. I believe the communication between Roberts and Grice occurred over synthetic telepathy, Grice was being told what I thought and was doing, and agent Roberts was someone watching me or involved on the other side.

Real commentary from these people
'why would someone deliberately rape'
'dopamine surge'
'injectable scorn'
'shock therapy'
'masturbation support'
'why would someone deliberately injure you'
'faggot, noone cares now. Lol'
'die'
