Being gang stalked and abused by staff when I was at OSH, who started all this. They got me caught up in something that lasted once I left, undercover police and other people following me around, involving the local police, sheiffs, people in medical establishments and all around participating. Some will just pretend they don't know when I'm being hurt and refuse to provide help or acknowledge the problem, ignore important health concerns, some harass and engage in abuse, offer fake and false advise, solutions, treatment, usually harmful, and refuse useful and necessary help. They'll lie about it and have deceptive explanations about it all. It comes in all varieties, sometimes they will hurt you outright. It's just how it is. The purpose can be for a gang of people to do things to a person in secret, target, hurt them anyway they can, and pretend they don't know what's going on, or the person is mentally ill when they're not. This happened to me at Oregon state hospital, in Springfield, Eugene, the Springfield police, sheriff, and state police participated, also happened at sacred heart medical center, laurel hill, lane county jail, and Springfield jail. Guards knew who I was, did things in secret, made faces, whisled at me, refused to help, they spied on me and knew everytging that was going on with this outside technology. They let me get raped and assaulted with this technology for months in jail, at OSH, and in the community, everyone participated.

[www.urbandictionary.com/define.php?term=gang%20stalking](http://www.urbandictionary.com/define.php?term=gang%20stalking)

Dishonest organization.

This happens to people of the public, often those targeted by the government, CIA, FBI, NSA, military, and local police and state police. It's hard to say who is the ultimate instigator as everyone is a willing participant.

Google has more stories about it, its often associated with people targeted by the above, with spying, synthetic telepathy and psychotronic use.

<http://www.stopeg.com/>

I had no way of describing it all till now, but it definitely fits. It's all very familiar.. I actually described very similar behavior before, this is just some of the information on how it happens.

I think its even possible the FBI is involved. What can i do?.. yeah I am about to pass out from sickness, my body is so tight and damaged now, constant abuse is killing me....

Hi, I wrote to you in 2010 over this issue, and I also sent many hand written mailings in 2011 and 2012. Is there anyone there who would investigate abuse by the police and government in Oregon? I have found out a lot more information about the technology behind the spying and abuse I've experienced, its called psychotronics and synthetic telepathy. Sound and radiowaves penetrante walls and travel Long distances, it can be focused into a

persona body and things done to hurt them. Simulate psychosis, rape and hurt people. Police in springfield Oregon knew what I did in private, in my apartment, they knew I was being followed by people and abused with this technology. God theres so many details, if I could at least get help making a report, know any agentes like those from the x files or anyone mildly concern about police, government and military misconduct? Please I am being destroyed in secret, my life dependa on getting help, I need Medical care but I can't easily prove how I was injured, the machine and those involved are are driving me into the ground for no reason. Their system can see and hear through walls, read a persons brain waves, see what I see, hear, think, Explore my Memory, use sound, microwaves, infarred, and other energy on me, remotely control my brain, play sound, noise, images, burn, chill my skin, tickle, itch, buzz, push, Bill, resonante skin and muscle tissue, I imagine a Type of 3D sound and electromagnetic projector that beams energy in focused patterns through the walls, targetting different parts of my body, my penis or muscles for example, ears or esophogus, plus everything else. I am being set up by the police and this was also used on me in jail, I was badly hear up by police WHO were involved and knew this was being used, the sheiffs were involved and now my case is being interfered with. They call it GEI sound. Like I am being framed to look psychotic, and will plead GEI. They are.tearingy body apart, please help.

Heres an email i just sent to my attorney with links and information about this technology. Maybe it helps you understand that it does exist, and how it works a little. Please get back to me, I need your help.

Perm address/ contact info

Todd Giffen  
405 W Centennial Blvd  
Springfield, OR 97477  
5413210010

I am staying at:  
2015 Myers Rd  
Eugene, OR 97401

There are many details, nearly all county and local/state government are involved, even I believe lane county mental health and this group home. I am being controlled by people and noone will come forward or admit to their involvement, I am not safe here. It's definitely real, please help. I am tired of being exploited and forced to live as a victim...

Links and email sent to my attorney today:

Here's a few links that I compiled with relevent information. Voice 2 skull is a confirmed military technology developed in the early 90s that sounds nearly identical to what I describe. Without ever having access to the Internet or related information, I described it appropriately as directional and focused sound and energy in 2008, staff said I was being watched with something outside thebuilding that could focus on me and watch me in private, and I know my experience and everything thats possible, what more do you need?. I was raped again twice yesterday, I am in shock, and at this very moment my body is being puffed up and beams twirl around my testicles. I swear these are some sick and demented individuals who would persist and target someone against their will just for kicks or to hurt them, that seems to be whats behind their purpose and program. It just is, I can't say why they'd be allowed to do it, they are just in to covering things up and abuse.

Space Preservation Act - real enough to ban. Congressman Dennis Kucinich wrote multiple bills to ban psychotronics, synthetic telepathy, and energy weapons, at least from space use - ground based use is still ok though: [http://www.sourcewatch.org/index.php?title=Space\\_Preservation\\_Act](http://www.sourcewatch.org/index.php?title=Space_Preservation_Act)

These are some of the more credible sources of information that I can find. My concern is that when and if this happens, there has to be a way to stop it and ask for investigations and protection over alleged abuse. Its not just the use of this technology, its the misconduct of the officials, police, and people involved. I tried to give you ideas to pursue proving this was happening, you obviously need to be willing to talk about it and make reports, ask for help. Otherwise people never get the oppertunity to consider it or look into it. When can you start helping John? I am seriously stuck in a hole with the damage and control they are exerting. I need your help coordinating and figuring this out...

My honest thought is that this has become more mainsteam and common place, its being used bu the police everywhere every day to monitor and target individuals if they wish. Especially since 9/11 and efforts to extract and collect information picked up. Wonder why the torture of terroists stopped? Maybe they switched to probing with synthetic telepathy. I guarantee it, but theres also a whole dark side to this technology and.how its used, and I've fully experienced that....

**Subject:** problems in oregon state

**Sent:** Mon, Dec 13, 2010 10:48:54 PM

i was in the oregon state hospital from 2005-2010. I'm writing to both attempt to make a report and also to seek assistance, I'm not sure where to start. My main problem is that while I was in the state hospital I was a target of physical and other abuse - I received neurological injury from the medication while I was there, from when I was given large doses of Seroquel improperly for a condition I didn't have and had received misdiagnosis by their clinicians, the medication caused severe nerve and muscle damage, every part of my body because really hard and locked up and I lost feeling and the ability to use most of the muscles. The staff and/or other entity of the state had also been inappropriately misusing some type of technological device to spy and follow me around the hospital, listen in on my conversations and study me physically and otherwise - I believe it was some kind of long-range radio/electromagnetic imagining technology that worked through walls and most obstacles. The information being gathered was fully available and staff mistreated me over it, my conversations and physical acts - the reason for this being that I had been involved in high profile staff misconduct with the likes of Bonita Tucker, her personal/romnatic relationships and improper physical contact with patients (including myself), her involvement in aiding the escape of several patients including Gino Publishi and David Anderson, bring in contraband, etc. I was a high target from the staff because of this, they gave preferential treatment to these patients and Bonita Tucker and anyone who was involved in the incidents, except for me. I was constantly harassed as she/the staff had accused me of being a stalker when her involvement with me was brought into question, and the staff hid and lied about the situation at the hospital. This also happened to cost me my release and was why I was being held at the hospital. The state police investigated me on this basis and they as well as the hospital hid any other fact about the situation. In 2008 I can't explain how it all happened,

but after a letter of mine was stolen/discovered and possibly passed to Disability Rights Oregon and several other people, although no official note exists in my record of any of this, events started to take place in which led to me being under heavy monitorment. I was being seriously heavily and physical harassed and abused by the staff during most of this time, and DRO and the investigative agency for the state seemed to be involved. There are lots of stupid small pieces as to why they were doing it, and not helping me in the least - part of my problem was I had been severely physically damaged by the medication, all my muscles in my entire body had become very tense and rigid (conditions known as tardive dystonia & tardive dyskinesia, although some of the damage was likely from severe physical harassment and trauma I'd been exposed to during this time), I couldn't move or relax most of them, my senses were all very sensitive, and for the most part I couldn't feel or control most of my body any more. I was involved into any of this and it was being done behind my back, but the staff and DRO and other agencies were having meetings about me and watching everything take place, DRO and everyone ignored my pleas for assistance despite providing ample evidence, for example times and date to review security footage from the cameras and microphones on the unit, and the DRO case manager (who worked under a federal abuse program, PAIMI) who was assigned to me mostly seemed to ignore everything I reported to her and went along with what the staff and everyone were doing. I don't really know why she did this or why they were putting me through this. I reported incidents of them discussing our private conversations, harass and staff talking to me directly, staff laughing at me, forcefully medicating me without my consent and without following the Informed Consent law and guidelines despite being informed otherwise and likely having a proper understanding of the law (in other words, deliberate medical battery), staff going as far during such incidents as to ripped me off the phone after having a doctor from the outside say they couldn't medicate me in this manner, refuse to call the on-call doctor, and verbally tell me during the process "we'll call the doctor after we give you the medicine, and after "no body cares about your rights, nobody is going to help you" etc. On another similar incident, a staff member held me down on a bed and punched me in the face many times with his fist, severely bruising and cutting my face, making me bleed, etc, and further choked and covered my face aggressively with a towel as I was put into restraints - they tried to prevent me from hiring a lawyer by refusing me access to my checks and money at some point, but I think it had something to do with the women from DRO who was working with me and the way they were handling the situation - I was in pretty bad shape and the hospital had been completely ignoring my grievances and complaints about this, and her advise to me was to stop filing the complaints and didn't seem to want me to file tort claim when I asked if I should do it. Her response to me after everything I had told her was to pretend it wasn't going on at first or like I was having mental problems, but after asking her why she didn't respond to the information I sent to her giving date by date and time by time information on the incidents and the security logs and everything that was going on, I was very upset, she paused and commented "the technology exists" ... - truth is the reports about my physical state and things I'd been going through had been getting back to DRO since at least 2007, and there were other times when I spoke with them that they knew about different things I'd said or had went through on the ward. They didn't seem to have a problem with the physical and mental mistreatment I was going through during most of the process, it didn't seem - clues range from staff communicating to me that DRO/entity thought they were being blackmailed, or I had called too many times reporting what I was going through and ran up a high bill for their 800 phone number - in 2008 they found a way to beam sounds specifically to me or a designated area, and started by playing a high pitched sound of someone blowing or whistling, to the point that I think i started to become very stressed. I think they also used this force on my body directly but I couldn't fully feel it because of the nerve and muscle damage. Sometime later after many more events

took place, they started talking to me "no one's ever made it this far..." and my body suddenly swoll up and I could hardly breathe, they were beaming some kind of energy/sound covering my body which was very painful and was irritaing my muscles and nerves, everything was puffing up very badly and I had a high pulse of 170+ after I finally had it checked. People and staff stopped talking and harassing me directly face to face or making noises around me anymore, instead they used this - they started talking about how they were getting tired of staring at my asshole, they'd talking about how I would just sit on the towel to smell my own farts (I couldn't poop anymore because my intestine stopped releasing lubricant and everything was drying up), they were telling me to call "DRO and rescind your suicidal" and all this different stuff, telling me there was some settlement and she'd come and deport me and help me get out of the hospital or something, I could hardly move but when I did finally call and say just that, they called me and pretended that I had called and did some intake when I had never spoken with them and asked "have something you need help with" or something, but I didn't really know what they were talking about and so instead we ended the call and she said "call anytime, okay?" - later DeAnn Major herself shows up but I wasn't really abloe to speak with her, she says she's going to view the security logs for some other patients and incidents she wants to see, I think I was supposed to tell her to check the recordings for what these guys were saying to me because they planned to have it show up there so she could get involved from that perspective, the abuse and harm that was being caused. But I couldn't think and wondered why she didn't check it all the times I reported before, and after she left they startted yelling at me "you weren't supposed to just let her leave" etc. They were talking about how it was some kind of unstructured settlement and just constantly overloading me with noise and other stimulii, screwing with my eye lids so I couldn't keep them closed, etc - staff would say to me "oh what you don't care?" and stuff but I couldn't hardly understand or get what was going on, I was in too much pain. They were trying to force me to do stuff. They made a bunch of themes like it was some type of romantic or about love between us and her, they'd previously also tried to get me to get put on suicide watch so that they could use some type of process called a "private transfer" to get me out of the hospital which never went through. They at one point did place me on suicide watch and said I would be transferred and pretended they were going to explain to me what was going on while I was asleep, the doctor stopped by (Dr. Duran) "oh let me tell you how this is going to work..", but when the morning came the Unit Director Jeff Birkholtz immediatly had me taken off and no transfer was ever made. Now for several years I have been going through this system and because I was never seemly able to get people involved and I was quite ruined by the whole process, and because I had aggressionj towards the whole process, I was civilly committed and then released into the community only after an entire year of being locked up physically and mentally, nothing hardly changing, they'd been using this process on me and stimulating my muscles and parts of my body but it hasn't had hardly any effect, and talking to me constantly, over stimulating me, they wouldn't talk to me about any of it and no physiscal or neurological services or rehab was ever offered and I believe the process hardly did anything beneficial for me and severely screwed my body and mind up. I could hardly talk or think about anything, I couldn't feel my body - I've been getting messed with by people in the community and my family who are involved, I couldn't do anything about it and my health wasn't improving a single bit - I have just discovered that steam room and hot water have helped relax my muscles some and it's been the only thing I've been able to do, but yet these people won't talk to me and act as if nothing is happening, they keep telling me to "stop it" and "bah humbug" "why are you doing this to me" and repeat it over and over, and over, but I was never getting any better and I'm tired of all this and want something done about it, they harass me with images of objects like pedobear, sometimes less offensive images, sex and pornography, people having faces and being

aggressive, other objects and motions and other sensations - they use it in my sleep to play dreams and show me images and videos, talk and .. when I try to confront anybody about it, they act like they don't know anything about it, but there's many people involved from this mental health place I'm involved at called Laurel Hill, they have people/agents following me around to stores and other places I go, and there are many times people there that seem to be playing along with them or were given some information, I mean at stores like Taco Time, Wal Greens, Verizon, YMCA, Dari Queen, Jerry's, when I was put in jail the clerks and several of the inmates working as part of the work incentive program seemed informed and targeted me with odd behavior and faces/etc, I was in jail because I tried to confront my grandparents who have been apart of this and they wouldn't talk about it, instead called the cops - which angered me and prompted me to break one of their printers when they refused to answer for it, and that's when I had the delite of going through the jail experience - my lawyer and the DA seemed to be aware of the situation, and besides me lawyer not talking to me much or really working with me about my side of things, I was given a special deal "diversion, with a special twist that I got to plead no contest when the procedure usually requires a guilty plea" - I never requested this deal, and had only communicated this privately to myself, I was very upset and thought that I would be forced to just make a plea but was upset that I had ever reason to be questioning people and that it wasn't my fault for what everyone was doing, so I said "maybe I'll plead no contest" to avoid the trouble - at the time I couldn't even hardly talk or do anything anyway, my vocal cords and throat, muscles everywhere have been squeezing me so tight and my mind has been screwed up or everything, even to move has been difficult, it would be the best I could do. In jail the guard would walk by and whisper "grow up " and crap, and they were talking about how one time I said the doctors at the hospital would be responsible for what went on and acted like being in jail was punishment for saying it or thinking it, but in reality I had no control over it because they were the ones that screwed me up and messed my body up, and were subjecting me to all this physiscal and mental torment and not allowing me to go see a real doctor or get any therapy for my physical problems, they didn't even consult with me before they did any of the stuff that went on. My primary doctor even gave me a talk about how he writes letters to people when he has a problem and often gets great service in return, then followed up by saying during the conversations about my difficulty getting help "maybe the ACLU will help if you write a nice letter, ... and" and then something about "why but you look and sound like a maniac" - but it was the physical things and problems that they had caused and were aware of that were making it difficult for me to speak or communicate, my brain and language and the amount of physical pain and discomfort I was in being quite hard to bear and deal with, and I was very frusterated by trying to do anything. I admit that things aren't great, all I can do now is yell back at them and occassionally break a wall or something, but they made me like this and then left me to deal with it, they never talked or asked me if I wanted this done or what I wanted to do, or gave me any options - the entire system was completely rigged. They might have tried to do it at some point in my favor but I didn't have any part in it and didn't really have a choice, no one would help me with the issues that were going on. I'm tried of being threatened and having these people doing these destructive things around me and having nothing to say for it, and not getting any of the healthcare or help I need, or being able to have rest or peace, or justice. They completely falsified my record and made false reports about the incidents that happen when they investigated the abuse at the state hospital, and none of the staff or people responsible ever had any action or charges pressed against them, they lied and created this entire mess and I shouldn't have to be the one suffering for this or putting up with this, I have no money for an attorney and could hardly get together the information require myself, I don't understand how something like this could happen and I not have any rights or way to do anything

about it. They think they're funny and above the law and that they're free to do whatever they want without consequences, and put it off onto me and I'm freaking out because there doesn't seem to be any way for me to prove what they're doing if everyone just keeps letting it go by - I mean I feel really unsafe and I can't do anything about it. If I'm in jail, please find me.
