Facility: SHRB

Department: EKG

GIFFEN, Todd M

02018079

DOB: 03/13/1985

48 HOUR HOLTER MONITOR

STUDY DATE: 01/29/2014

REFERRING PHYSICIAN: Timothy Walter, ND

RECORDING BEGINS: 01/23/2014 at 1016

RECORDING ENDS: 01/25/2014 at 1014

FACILITY: RiverBend Outpatient

MEDICATIONS: None listed

## IMPRESSION:

1. The patient activated the event marker 10 times reporting symptoms of possible heart palpitations, increased heart/gagging reflex, pain in head and heart, chest tightness, severe splitting pain in chest, lots of soreness in chest/heart. During the time he mentioned he had concerns about the actions of the government; he noted increased pain and his "heart hurts", and rhythm was sinus rhythm, sinus tachycardia with rates to 115 BPM, isolated premature ventricular complexes, quadrigeminal PVCs at times. During symptom of "heart/gagging reflex" rhythm was sinus at rate of 95 BPM.
2. Premature ventricular complexes (445 during the recording). Bigeminal and quadrigeminal PVCs at times.
3. Supraventricular ectopic beats (11 during the recording).
4. Sinus rhythm/sinus arrhythmia with an average heart rate of 88 BPM. Maximum

2/3/14  
(12)
