great work. thought i'd like to collaborate with you a bit. find out who you are. tell you about my website. i run
<http://www.oregonstatehospital.net/>

i am building a legal case against the hospital to hopefully have it shut down. i was abused there, nonconsentually violated with a microwave weapon by the state and CIA. look at nsa.pdf. they tired to kill me, set me up due to the states lack of liability insurance. this weapons system, Electronic Brain Link, and Remote Neutral Monitoring, allows them to spy and remotely monitor nerve impulses. it can be used to decode all brain waves, see what a person sees, hears, thinks, feels, remembers, dreams, etc. it can alter brainwaves, beam audio, images, video, etc in to the mind. it can flood a persons body with micrwoaves and light energy, move tissue, heat, cold, expand, buzz, and allows remote manipulation. in august 2008, they tired to murder me with it, the staff were abusing me on 48B, covering up the Bonita Tucker scandal. the state lacked liability insurance, this staff sexually abused me, lied about it, my release was sabotaged, and the state covered it up. the staffer went on to aid two patients escapes, including her new patient boyfriend, and she smuggled him larges amounts of morphine, amphetamine, marijuana, etc. the state didn't arrest her, protected her, and covered it up. the union at OSH as powerful as it is, doesn't get prosecuted by the state. this women enjoyed special protection, the staff abused me, assaulted me, ramshacked legal paperwork, and more. i was spied on with this weapon and made a target. lots of abuse caught on tape, with audio recordings. i need some help investigating. i also want to collect informations, testimony from other patients about abuse. i intent to sue OSH, expose abuse, and get these fuckers locked up. i want the state to shut OSH down, and i expect every involved staff member to be held criminally liable. look up my website for more details. btw, promoting it with a link welcome. :)
