

The Matrix Deciphered is Dr. Robert Duncan's first book, originally written in 2006 along with another book called "Hacking the Mind". Duncan is B.A., M.S., M.B.A., Ph.D., degrees from Harvard, MIT, Dartmouth, Stanford. Worked for the CIA, DOD, US DOJ, NASA, making surveillance & weapons technology, including mind hacking technology which he believed would help treat people's mental illness. He then learned the CIA was using it to torture and slaughter thousands of innocent Americans...

The Matrix Deciphered highlights/evidence:

Here is secret #1 that has been suppressed by the forces of ignorance in the government. There was a patent that I will keep referring to throughout this book because of the importance of the work. It is published in the appendix. In 1974, Robert Malech, an employee of Dorn & Margolin Inc., a major defense subcontractor in radar design now owned by EDO Corporation an even larger all defense contractor in electronic warfare, invented a fairly simple radar device that could read whole brain electrical activity at a large distance. It has the major advantages of no wires and full brain electrical activity analysis, not just points on the skull surface. He discovered and perfected a way to use some simple electromagnetic oscillations anywhere from 100Mhz to 40 Ghz to read brainwaves by "illuminating" the brain and its electrical conductance then reading the return signal. The imaging method observes the changes of frequency resonances, amplitude, and phase which represent the states of neuron depolarization throughout the brain.

Secret #2. But more profoundly, he discovered that he could influence brain waves if precisely timed with a return training signal. He had no idea that at this moment in history, he had accidentally destroyed democracy as we envision it to be. The military and surveillance community immediately picked up on the patent and within two years had reprogrammed their communications and surveillance satellites and terrestrial phased arrays with the new concepts. The rapid deployment of this technology occurred because it only required software changes in already existing radar, imaging, and communications' terrestrial dishes and satellites. Many additional spy satellites have been launched since to bolster the system. So in 1976, on the bicentennial of this great nation, a system called TAMI was born. TAMI is an acronym for "Thought Amplifier and Mind Interface". A more invasive "Big Brother" technology came about before George Orwell's prediction of 1984.

Secret #3. Stealth RADAR techniques were first recorded by observing the Russian bombardment of the U.S. embassy in Moscow with microwaves. Using high powered steered phased arrays and focused directed energy from two sources next to each other, one can create a nearly undetectable "scalar" wave, or destructive interference at the point of interest. With just a minor energy interaction, the interfering beams bounce back with strong signal to noise ratio to be resolved at the sources again. This allows for any imaging technique to be done from extremely large distances. In effect, it makes distance irrelevant to the detection feature, be it RADAR, MRI, or ESR imaging.

At the same time, the Russians had discovered and were developing similar capabilities. This accelerated the secret arms race that continues to this day. The research and capabilities have come a long way in the last 30 years. Even if one didn't have direct access to the knowledge of surveillance capabilities, one could project out in time 30 years knowing technology developments increase at an exponential rate. At that time the military demonstrated the capability of reading automobile license plates from satellite images.

In order to cover up and not draw attention to mind reading radar, the whole field of psychic phenomena and paranormal psychology was invented to deceive the civilian populations of what was occurring. The Russian's showed their hand when they started bombarding the U.S. embassy in Moscow with microwaves in the late 60's, and then with the 7 Russian Wood Pecker transmitters that began operation in 1976 pointed at the U.S.

Unfortunately, due to the nature of this new weapon, many human minds are needed to create the database of specific brain data necessary to increase the effectiveness on a larger and larger population. These are referred to as the "Cataloguing and Cloning operations". In this context, cloning does not refer to human cloning, but EEG cloning. Many have misunderstood this fact and then it was popularized by the T.V. series "X-Files". These cloning operations are what plague the human race today as every country feels the need to have this weapon that requires torturing and killing many people of their own populations to develop.

EEG cloning means to copy someone else's brainwaves onto another person. The discovery made by Robert Malech allows this to be done wirelessly anywhere in the world. A new military division emerged called The Psychic Warfare Unit initially stationed in the Pentagon but most likely it was rolled into the Psychological Operations, Electronic Warfare, and Informational Warfare Units. Initially this became a great intelligence gathering tool. Psychically spying into other people's minds was an incredible feat.

I don't use the term EEG cloning much because it refers only to the special case of observing a targets mind. That is only one aspect of the technology. Malech discovered he could influence brain waves just as easily as reading them. So at the other extreme, a psychic warrior can EEG clone his brainwaves onto a target. This is symbolized in the movie "The Matrix" where the agents take over random citizens bodies while in pursuit of the heroes. The correct terminology to describe everything in between the two extremes is EEG heterodyning. Heterodyning is an engineering term which means to mix signals. So EEG cloning is just a special case of EEG heterodyning.

EEG cyber hive mind is another term used for EEG heterodyning for non-weapons use experiments. These are collectives of people who share one common set of brain waves. They jokingly refer to the process of forcing someone into a collective as "Borging" them, a reference to the evil cyborg civilization from Star Trek. They are studying both the long term effects of being in this kind of collective mind configuration and how to use it to control, spy through, disable, or kill a target. They also are studying communication and organization without spy gadgets of any kind for synchronized missions.

The emerging field which intersects at the physics of psychology is called "psychophysics". The dynamics of the mind are well described from neuroscience reductionism. Artificial neural networks have been around for over half a century. But the new challenge is to map exactly the subjective experiences of consciousness to the physics of organic intelligences informational signal processing including biochemical and electromagnetic. The word "Psychophysics" has additional connotations that are quite appropriate in the way that this field has evolved in the secret labs around the world. The tools of psychophysicists are called psychotronics. It is this area of research that has given rise to all the conspiracy theories on the New World Order psychoterrorists, secret societies involvement, mind control and satanic cults. Mind control weapons are the holy grail of the ultimate weapon and has given birth to the world's most notorious, sociopathic scientists which in turn have spawned a generation of

the most intense human suffering for weapons testing efficacy the people of this planet have ever endured.

The First Documented use of Mind Reading RADAR

In order to reduce the effects from the bombardment of the U.S. embassy in Moscow with microwaves, they put up microwave screens on the windows of the building. Oddly enough, this actually had the opposite effect of increasing the microwave intensity inside. The only way this can happen is if interferometry was being used on the embassy. If you block a path of the interfering / heterodyning wave fronts, you can lessen the destructive interference pattern thereby increasing the measurable energy. This was the first documented use of so called "scalar weapons".

...

Electron Spin Resonance (ESR)

This is the secret sauce that the conspiracy kills to keep secret. Notice that there are no ESR machines in hospitals. Why? Because it would become immediately obvious how easy it is to read body electricity from RADAR, i.e. brain waves at a distance. The basic concept is simple and very analogous to the way Magnetic Resonance Imaging works. It works on manipulating spin and gyro frequency of electrons.

Electron Spin Polarity Resonance (EPR)

In this imaging technique the spin polarity is measured by flipping it which adds or subtracts energy from the system. Energy must be conserved so a photon is given off if it goes to a lower energy spin state. It is "heated" during the movement to a higher energy state prepping it for a synchronized transition back to a lower energy state. The body's electricity is modulated into delayed state transitions because of the local electric field variations. This return signal is processed and the very high signal to noise EEG patterns are extracted. The sensitivity is truly "science fiction" like. Even a single nerve or neuron firing can be picked up individually. This gives new meaning to Signal Intelligence.

Magnetic Resonance Imaging (MRI)

Very similar to the way magnetic imaging works with the spin of the nuclei of atoms with their magnetic moments.

...

Millimeter wave, Infra-red and Visible Wavelength Satellite Imaging

This topic is self explanatory. Everyone has seen the incredible detailed infrared imaging capabilities of the military. They can see heat signatures through walls. What do haunted houses, ghosts, alien abductions, and the Bermuda Triangle have in common? Remember how the air becomes electrified before a haunting by the appearance of a poltergeist in movies inspired by this weapons testing on the public? We've busted our ghost in the machine! Remember how planes would be downed in the Bermuda Triangle because their compass needles and instruments would go haywire? Those were directed energy attacks from the Puerto Rico Radar field built in 1959. Remember all the shows about cars stalling and radio stations flipping right before an alien abduction scenario? These are all the same RADAR tricks but with varying degrees of lethality. These tricks are all done by the same technology and the usual criminals in the bowls of the beast.

Van Eck Hacking

Hacking the human brain

Computer hackers are always finding ways to zombify as many machines as they can. This means that they find a way to hack into your system and install remote control software of some sort. The Military's programs, called Zombie I-V, were similar in goal. They wanted to be able to hack into people's minds and create remote controlled zombies. They succeeded over 30 years ago and the technology is now close to perfected. There is a stalking phenomenon occurring in America and around the world. Read "Terrorist Stalking in America" for another perspective.

There are three kinds of stalkers one of which have been released by the freedom of information act documents that describe government stalking programs, or goon squads as they are called in slang. CIA and other agencies training their employees for intimidation tactics abroad and in the US are one form of the members of terrorist stalking gangs. The CIA has used these tactics to help overthrow governments and intimidate leaders of other countries many times in history.

The second purpose is to play into society's programming that people who think government agents are following them are crazy. Discrediting an individual through mud slinging, black mail, or erratic behavior has been a high priority documented skill for these agencies.

The other two types of stalkers are more dopes and victims of zombification. The global system, TAMI, can hone in on a compatible mind and instantly be able to manipulate it to some varying degree dependent upon many factors. The offense practices their trade by influencing people near a targeted individual to convey information only pertinent to them, for spy games. These people are everyday citizens unfamiliar with this high technology. The effects are so subtle without lots of training to detect, nobody would be the wiser. They would at most just question why they did that or felt the need to say that.

...

Monitoring of Life Signs and Psychic Star Wars Defenses

So almost every human is monitored and tracked by various integrated technologies. One justification for TAMI is that a global system to monitor everyone is necessary to alert the military in case of a psychic war and protect the leaders from electromagnetic influence. But of course in reality it is used for the exact opposite purpose. Uniqueness of heartbeat and breathing patterns (list patents).

Other Star Wars Directed Energy Weapons Plans

I have seen plans for electromagnetic rail guns for launching projectiles in space at other satellites. They use superconducting high powered magnets to accelerate projectiles faster than bullets.

Imaging the brain and other Earth objects

From my protected sources I have seen, brain images derived from the TAMI system. I was not told how they were produced but I can reverse engineer some possibilities given what I know about surveillance capabilities. Using cognitive modeling techniques, one could construct a PET or functional MRI like image showing brain activity simply using the phase, amplitude, and frequency information from mind reading RADAR. A spectral image could be constructed based on models of brain function and an electron spin resonance topographical head map. Since the brain activity is precisely known, it could be rendered and displayed in a 3-D image. Other methods might include using sub-millimeter or Terahertz wave length RADAR or Earth Gauss MRI/ESR techniques. Incredible that this can all be done with a constellation of spy satellites or ground based phased arrays. In medicine one technique is called computed tomography or CAT scan which use x-rays to obtain image data from different angles around the body and then uses computer processing of the information to show a cross-section of body tissues and organs. X-rays are not used for obvious health reasons by the equivalent RADAR imaging but any or all wavelengths under the visible spectrum can be used to obtain a very good image of a person. The infamous HAARP phased array that stretches across Alaska is capable of Earth penetrating tomography.

...

Memory Probing

One of the more useful aspects of this technology is the ability to probe memories. The EEG heterodyning practice attackers play the same game with all victims. They are able through two techniques to walk the victims back in time to think that they have been linked to the victim since birth. Since the capabilities of remote neural stimulation are nearly identical to electrical probes in the brain, a random neural stimulation will trigger memories. This is not used for targeted memory recall, but rather for finding and recording memory anchors for further investigation.

Those memories are used through synthetic telepathy conversations to make the target remember other connected events. Of course direct vocal interrogation techniques can achieve the same results. Over time, this process is effective to get a complete profile of a person's life. Another tangential method used in connection with interrogations is an injected guilt signal. This forces memory recalls in conjunction with a specific memory anchor. So if you feel guilty about some particular memory, those additional memories will surface. And the last method used in these psychic games is more incredible. While the databases storing mental activity are impressive they still don't have the ability to record every human's brain activity continuously for later parsing. They instead sample activity in time and save it. They only have clips of a particular mind, throughout their life, stored for later review. This cuts down on the 1.4 Terabytes per second collective human geopsyche throughput that would be required. $1.4 \text{ Terabytes} \times 31,536,000 \text{ seconds in a year} = 44,150 \text{ Pentabytes per year}$. The capabilities of computer storage will reach that soon enough for DoD budgets. So reviewing a particular targets brainwave clips, allows them to appear like they have been with the subject of experiment for their entire life through demonstration of knowledge of earlier events.

This brings up the topic of criminal law. Think about how we could perfectly convict crimes against other people. In the movie "Minority Report", their society is able to prevent all premeditated violence.

Only crimes of passion continue to be unstoppable. What a shame our government keeps this technology secret for pathetic military and spy uses.
