# Army Yanks 'Voice-To-Skull Devices' Site

By [Sharon Weinberger](#)

05.09.08

8:26 AM

The Army's very strange webpage on "Voice-to-Skull" weapons has been removed. It was strange it was there, and it's even stranger it's gone. If you Google it, [you'll see the entry](#) for "Voice-to-Skull device," but, if you click on the website, [the link is dead](#).

The entry, [still available on the Federation of American Scientists'](#) website reads:

*Nonlethal weapon which includes (1) a neuro-electromagnetic device which uses microwave transmission of sound into the skull of persons or animals by way of pulse-modulated microwave radiation; and (2) a silent sound device which can transmit sound into the skull of person or animals. NOTE: The sound modulation may be voice or audio subliminal messages. One application of V2K is use as an electronic scarecrow to frighten birds in the vicinity of airports.*

The U.K.-based group [Christians Against Mental Slavery](#) first noted the change (they also have a permanent [screenshot of the page](#)). A representative of the group tells me they contacted the Webmaster, who would only tell them the entry was "permanently removed."

The image above is one person's self-styled depiction of how a "voice-to-skull" weapon might work.
