US District Court of Oregon – Federal Habeas Corpus, case number 6:13-cv-02067-SU

Dear US District Court of Oregon (Judge Sullivan, or Judge Aiken):

Dear whomever is handling the objection to dismissal of my case. I have obtained new evidence, a witness who came forward and wanted me to have information about these weapons that she personally learned about while working for the US government. She worked for a US military contractor called US Investigative Services, and she confirmed the weapons and abuses I am complaining about in my petition are real and really exist. I have included the text transcript of our conversation, and I have the conversation recorded if you want to hear the audio version. If you want to know who these people are, I can provide that information, but she is worried about getting treason charges (so I'd rather wait for an attorney to be assigned before disclosing more).

Really, these are issues of criminal misconduct by employees of the government, doing psych experimentation, surveillance, and torture using illegal directed energy weapons.

I am dealing with other issues related to these abuses. My attorney has informed me that the courts are refusing to allow him to hire a private investigator, experts, or to pay for basic services of my defense. I think this violates the law, including my right to due process, and effective counsel, and compulsory process for gathering witnesses for my favor (5th, 6th, 14th Amendments). The court is sabotaging my criminal defense. My defense themselves may be incompetent.

I have been informed that I may be without protection unless you intervene. I hope that you reconsider and allow my Habeas Corpus to proceed. I am dealing with incompetent counsel, and abuse from the courts in Lane County over these issues. I am being left to die and get hurt, literally no one is doing anything to help me. The attorney and court is also refusing to allow me to be assigned to a new attorney. The injury to my brain and body are pretty severe from the remote weapons attacks, and they are not going to stop using this on me unless you or someone else intervenes.
